

TEXTURED GLASS

Elegant design and functional safety, privacy and daylight. All thanks to textured glass, often referred to in the design community as pattern glass, has ridges and a bumpiness to the touch. Making use of a whole array of visual styles and arts, such as classic, modern, modernist, industrial design, we present various possibilities.

Textured glass is subtle, yet effective at evoking interest and atmosphere while creating bright, private spaces. Textured glass is durable, fingerprint, and scratch-resistant and often used for partitions and doors, along with a range of other decorative applications.

LEGEND

PATTERN ORIENTATION

L – longitudinal, when parallel with the glass sheet length.

T – transversal, when perpendicular with the glass sheet length.

THICKNESS & DIMENSIONS

Other thicknesses & dimensions on request. Please contact Customer Service Department for details.

PRIVACY

H – HIGH privacy, glass ensures intimacy.

M – MEDIUM privacy, glass protects against direct look.

L – LOW privacy, glass does not ensure privacy.

PRODUCTS TO ORDER (MTO)

MTO – products which are not available directly from the warehouse, manufactured in dedicated production campaigns on customer's request.

The minimum volume required to launch the production of MTO products caused by a change of the pattern:

· 4 mm – 7.000 m² · 6 mm – 5.000 m²
· 8 mm – 3.000 m² · > 8 mm – 1.500 m²

The minimum volume required to launch a new production campaign of MTO products caused by a change of the thickness: Thickness change – 2000 m².

Each dedicated production campaign entails the obligation to collect the entire manufactured glass within 1 month after the completion of the production campaign
