

## DIGITAL PRINTED

Digital ceramic printing redefines what's possible with glass. By combining state-of-the-art Dip-Tech technology with ceramic-based inks, we produce vivid, high-resolution imagery that becomes an integral part of the glass itself. The result? A fusion of beauty, durability, and limitless design potential. Whether you're creating bold architectural statements or subtle, refined details, digital ceramic printing empowers you to bring your vision to life without compromise.

## TECHNICAL OVERVIEW

### Glass Types

Tempered, heat-strengthened, laminated

### Inks

Full CMYK range, white, and specialty finishes

### Print Resolution

Up to 720 dpi (photorealistic quality)

### Panel Sizes

Fully customizable

### Firing

Inks fused into the glass during tempering
